ORIGIN AND BREEDING HISTORY OF THE VARIETY

1. ^{REBEL}~~'RIVAL'~~ originated in Idaho during the fall of 1965 from a hand pollinated cross between Early Perfection 3019 (female parent) and Sprite (male parent).

2. After the original cross, subsequent generations (F₂ - F₇) were selected for vine type and maturity. It was from the population from a single plant selection taken in 1970 that multiplication of ^{REBEL}~~'Rival'~~ began.

During the summer of 1974 screening tests were conducted by the U. S. D. A. ARS western region, Pullman, Washington for Fusarium wilt race 1. Tests demonstrated complete resistance.

In January of 1977, ^{REBEL}~~'RIVAL'~~ was screened for Fusarium wilt race 2, (Near Wilt) at the U. S. D. A. Irrigated Agriculture Research and Extension Center, Prosser, Washington. This test also demonstrated complete resistance.

3. This variety was stabilized in the eighth generation. Field reports have indicated a homogeneous variety for the past six years.

DATA INDICATIVE OF NOVELTY

Novelty is based on the unique combination of the following characters:

~~REBEL~~
~~RIVAL~~ is similar to Perfection 3019 but differs by being one day later in maturity, having a tight, less curved pod, and has a less stocky vine type.

EXHIBIT "D"

REBEL

"RIVAL" is a canning variety, determinate, double podding of midseason maturity.

✓ The vine and peduncles of "RIVAL" are of medium stockiness whereas Perfection 3019 is quite heavy.

REBEL

"RIVAL" has a more compact vine due to shorter internodes 3.6 cm versus 4.3 cm of Perfection 3019.

REBEL

"RIVAL" has less heavy foliage than Perfection 3019 due to smaller diameter stipules and leaflets.

REBEL

✓ "RIVAL" flowers on the 14 - 15th node whereas Perfection 3019 flowers on the 13 - 14th node.

REBEL

"RIVAL" has a tight, straight - slightly curved pod similar to Small Sieve Freezer.

REBEL

"RIVAL" grows to a height of 60 centimeters under irrigation in the Columbia Basin and 51 centimeters in the non irrigated areas. However height will vary according to location. Leaflets are marbled but only slightly. Stipules are marbled.

INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and \$250.00 fee to U.S. Dept. of Agriculture, Agricultural Marketing Service, Grain Division, National Agricultural Library, Beltsville, Maryland 20705. (See Section 180.175 of the regulations and rules of practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

- 5 Give the date the applicant determined that he had a new variety based on (1) the definition in Section 41(a) of the Act and (2) the date a decision was made to increase the seed.
- 13a Give (1), the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. (2), the details of subsequent stages of selection and multiplication. (3), the type and frequency of variants during reproduction and multiplication and state how these variants may be identified and (4), evidence of stability.
- 13b Give a summary statement of the variety's novelty. Clearly state how this novel variety may be distinguished from all other varieties in the same crop. If the new variety most closely resembles one or a group of related varieties; (1) identify these varieties and state all differences objectively; (2) Attach statistical data for characters expressed numerically and demonstrate that these differences are significant; and (3) submit, if helpful, seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty.
- 13c Fill in the Exhibit C, Objective Description form for all characteristics, for which you have adequate data.
- 13d Describe any additional characteristics that are not described, or whose description cannot be accurately conveyed in Exhibit C. Use comparative varieties as is necessary to reveal more accurately the description of characteristics that are difficult to describe; such as; plant habit, plant color, disease resistance, etc.

14A If "YES" is specified (seed of this variety be sold by variety name only as a class of certified seed) the applicant may NOT reverse his affirmative decision after the variety has either been sold and so labeled or published or the certificate has been issued. However, if the applicant specifies "NO", he may change his choice. (See Section 180.15 of the Regulations and Rules of Practice.)
